**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 5, 10, 14-16, 18, 19, 25, 26, and 28 are allowed.
2. The following is an examiner's statement of reasons for allowance: In accordance with MPEP 707.07(f), the previous rejection of the subject matter of claims 5 and 14, as rejected in the parent case 09/444083 in the Office Action dated 2/21/03 is withdrawn based on applicant's arguments filed 4/12/04, specifically pages 7 and 10 regarding applicant's definition of the transverse distance between a set of fasteners. Based on the transverse distance between a set of fasteners as defined by applicant, the overall claimed combination of an absorbent article as claimed comprising a fastening system comprising first and second fastening components disposed on the back side panels, which provide a pant-like configuration, and further comprising elastomeric components disposed between the fastening components and the absorbent assembly where a transverse distance between the first and second fastening components is substantially equal to a transverse distance between the first and second mating components, and further comprising leg elastic members longitudinally aligned along each side edge in the crotch region. The leg elastic members having front terminal points located adjacent longitudinally innermost parts of the front side panels and back terminal points located adjacent longitudinally innermost parts of the back side panels is neither anticipated nor rendered obvious by the prior art of record.
